

“The latest solution for temporary pedestrian, cyclist and vehicular management”

## ARMORCADE DELINEATOR

ArmorCade is made up of 2.0m long plastic units (MDPE) that join together using integral interlocking lugs to form a continuous delineator.

Through innovative design, ArmorCade can be installed straight or with acute radius curves, up to 90 degrees if required.

### BENEFITS INCLUDE

- Low Procurement Costs
- Low Long Distance Shipping Costs (132 units fit into a 40' container)
- Low Transportation Costs (60 units fit a 6m truck deck)
- Easy Installation (No steel pins required)
- Long lifespan due to quality MDPE construction
- 100% Recyclable (No internal or external steel)
- Economical Use of Water (optional)

### PRODUCT IDENTIFICATION & FEATURES

- |                  |                     |
