Specifications

POLE SHAFT

The composite lamp post shall be smooth straight. The post shall be 4 inches (102 mm) in diameter with a nominal wall thickness of .28 inches (7 mm). The hand hole shall be 2 inches (51 mm) x 4 inches (102 mm) with a cover. The post shall be constructed of fiberglass reinforced polyester resin utilizing glass roving, continuous strand mat and off axis fibers oriented for optimum strength and rigidity. The post shall be non-conductive and chemically inert.

PERFORMANCE CRITERIA

The post shall be designed with a minimum safety factor of 1.5:1 and have no more than a 10% deflection at full wind loading. The post shall deflect no more than 2.5% of the above-ground length with 100 lbs of lateral top load (stiffness). Poles shall be tested and rated per ANSI C136.20-2012.

DIRECT EMBEDDED INSTALLATION

Direct embedded poles shall have a 2 inch (51 mm) x 4 inch (102 mm) hole for conduit entrance 24 inches (610 mm) below finished grade. Embedded depths may vary per local codes, site soil conditions, drainage and very high wind conditions.

ANCHOR BASE INSTALLATION

Anchor bases shall be constructed of galvanized steel or 6061-T6 aluminum base. The base shall be factory bonded to the post. The anchor base shall have four holes at ninety degrees, accommodating a bolt circle of 7 inches (178 mm) to 9 inches (230 mm).

POST TOP

A painted A356-T6 aluminum tenon shall be firmly bonded to the pole for mounting a post-top luminaire or arm.

FINISH

The surface of the post shall be uniform and consistent for the entire length of the post. A UV-resistant catalyzed urethane coating shall be extremely durable and retains its gloss after a 5000 hour exposure test per ASTM G154, with no dulling or chalking of the surface.

ORNAMENTAL BASE COVER

The ornamental decorative base cover shall be one piece and constructed from a proprietary elastomeric urethane and finished to match the post. The base shall be corrosion free and extremely resistant to impact and chipping.
