## Brings All Your Pivots – Into One Connected Network

## The Right Fit for Every Farm

Introducing the Valley® ICON+ smart panel, the newest addition to our innovative ICON family. Built for farmers who need simplicity with essential functionality.

The Valley ICON+ smart panel combines the reliability and performance of the ICON panel lineup with a focus on core operational needs. It provides growers with essential control features right at the pivot point and advanced management capabilities from your smartphone, tablet or desktop computer. This means you can bring your entire fleet of electric pivots—into AgSense® 365. Plus, it uses your existing control panel as a host, so there's no need for a full panel upgrade. It's an easy way to add new features and capabilities.

### Key Features:

- AgSense® 365 remote irrigation monitoring and control comes built in and ready to use
- Critical controls available on easy-to-use, 7-inch, full-color touchscreen at the center point
- Adds direction control to any electric drive pivot
- Includes Valley GPS and pressure transducer
- Compatible with Crop Link® and Pump Command® for remote pump control
- Connect your entire fleet of pivots
