

OVERVIEW

The **ArmorBuffa™** is designed to protect the end of a temporary concrete barrier and other steel temporary barriers. It is approved for MASH TL2 use up to 70km/h (43mph) and MASH TL3 use up to 100km/h (62mph).

The innovative ArmorBuffa™ system utilises a Nose Piece, water-filled Elements, Pins, a Transition and mechanical anchors to absorb kinetic energy of impacting vehicles.

The system has a nominal 1100mm height, 525mm width, and an effective length of 9313mm for TL-3 when installed on a temporary steel barrier.

TL2 for speed zones up to 70km/h

TL3 for speed zones up to 100km/h

FEATURES

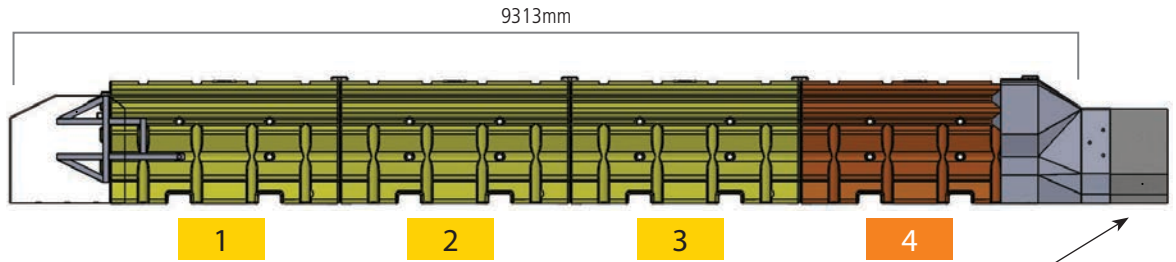

- Compliant to MASH TL2 70kmh (43mph) and MASH TL3 100km/h (62mph).
- Designed to protect the ends of a temporary concrete or steel barrier.
- Designed to perform on a variety of foundations including concrete, asphalt, and any other surfaces capable of bearing the weight of the system.
- Simple to install.
- Narrow profile, saving space on the worksite.
- Easy to transport, fast to install and dismantle.
- Cross slopes of up to 8% (5° or 1:12 slope) can be accommodated with the standard hardware.
- ArmorBuffa elements are manufactured from HDPE and MDPE and any units damaged beyond repair can be recycled.
- The connector pins, nosepiece and transition are manufactured from steel and can also be recycled.

TL-3 Configuration

3 yellow elements
and 1 orange element

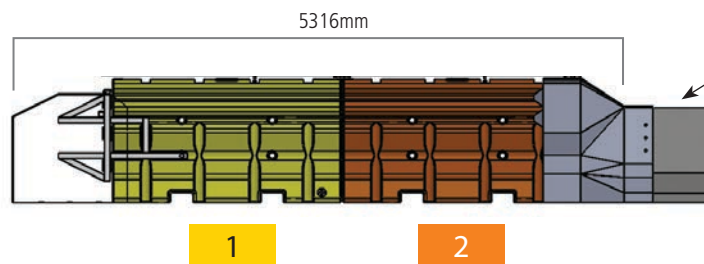

TL3 for speed zones up to 100km/h

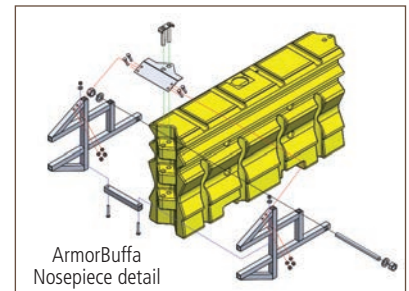

TL-2 Configuration

1 yellow element
and 1 orange element

TL2 for speed zones up to 70km/h

Temporary Concrete or Steel Barrier

SUMMARY

ArmorBuffa™ meets MASH TL2 and TL3 crash-test criteria for temporary end treatments that are designed to protect the end of an unanchored temporary concrete barrier or temporary steel barrier. It has been designed with ease of deployment and removal in mind. It excels in durability and adaptability across a variety of installation environments. This is made possible due to its innovative engineering which elevates ArmorBuffa™ to the leading temporary end treatment available in the hire market.
