

Helping Farmers Produce More, With Less

Learn why Plant Insights is a smart investment that produces a high ROI.

Production and input costs are rising faster than ever.

Average cost of diesel fuel and labor per field visit:

\$200

Average cost of weed or pest treatment per acre:

\$50

Average cost of fertilizer per acre:

\$180

Fuel
up 40%

Labor
up 17%

Fertilizer
up 40%

Chemical treatments
up 30%

Growers need to detect and address issues quickly, to optimize input and labor costs.

Emergence

Disease

Nutrient deficiency

Weeds

Pests

Plant Insights reduces costs.

Save thousands by targeting treatments when and where they're needed, reducing trips to the field, and improving the precision of field scouts.

Up to **\$500**

Savings from scouts spending less time in the field

Up to **\$1000**

Fuel and labor savings from 5 fewer trips to field/year

Up to **\$5000**

Savings from 1 less weed or pest spraying per season per field

"Without a doubt, Plant Insights pays for itself."

— Ryan Brink, Crop Production Manager, Golden Grain Farms

Plant Insights increases revenue.*

Optimize the timing of treatments to produce healthier crops and higher yields, increasing revenue in every field.

\$11,250

Potato

\$2,100

Cotton

\$3,400

Corn

\$1,200

Soybean

"If you can improve yield a little bit, it makes a huge difference ... and that more than pays for Plant Insights."

— Beau Hartline, Farm Manager, Alsum Farms

* Note: Revenue improvements are based on a 2% increase in yields per field. Estimates are based on market prices and average yield results provided by the USDA (Crop Product, August 2022; ISSN: 1936-3737). Actual revenue increases realized using Plant Insights may vary.

Supported Crops & Detections

All crops include Hi-Res Images, AI Analysis, Weekly Reports, GPS Location, and Data Collection with every Pivot rotation.

Corn

Emergence, Canopy Cover, Weeds
Pests: Grasshoppers, Insect Feeding Damage, Corn Rootworm scraping, Japanese beetle
Diseases: Rust Tar Spot GLS/BLS NCLB
Additional: Nutrient Deficiencies

Potato

Emergence, Canopy Cover, Weeds
Pests: CPB Insect Feeding Damage
Diseases: Necrotic plants (Ver), Wilting plants (Scler)
Additional: Senescence

Sorghum

Emergence, Canopy Cover, Weeds

Cotton

Emergence, Canopy Cover, Weeds
Pests: Stink bugs, Square drop

Peanuts

Emergence, Canopy Cover, Weeds

Soybean

Emergence, Canopy Cover, Weeds
Pests: Stink bugs, Grasshoppers, Japanese beetle, Insect Feeding Damage

Sugarbeet

Emergence, Canopy Cover, Weeds

Drybean

Emergence, Canopy Cover, Weeds

Alfalfa

Canopy Cover
Additional: Flowering
