

Temporary Delineator

INNOVATIVE DESIGN FOR ADAPTABLE USE

The latest solution for temporary pedestrian, cyclist and vehicular management

How it Works

ArmorCade is made up of 2.0m long plastic units (MDPE) that join together using integral interlocking lugs to form a continuous delineator.

Through innovative design, ArmorCade can be installed straight or with acute radius curves, up to 90 degrees if required.

Easily Movable

Features & Benefits

- Made in New Zealand for superior quality and durability
- Low Procurement Costs
- Low Long Distance Shipping Costs: 132 units fit into a 40' container
- Low Transportation Costs: 60 units fit a 6m truck deck
- Easy Installation with no steel pins required
- Optional heavy duty 25kg model available
- Long lifespan due to quality MDPE construction
- 100% Recyclable – No internal or external steel
- Economical Use of Water (optional)

Secure Connection	Yes
Stackable	Yes
Movable	Yes
Adaptive Radius	Up to 90°
Weight	20kg (standard) or 25kg (heavy duty)
Length	2000mm
Height	1000mm
Base Width	380mm
