

# Splice Mounted Delineation Bracket

Using the existing guardrail fasteners, the **SMD Bracket** is easily secured to your run of guardrail via the standard M16 splice bolts.

Compatible with W-Beam and Thrie-Beam rails, and moulded from a UV stabilised Nylon, the flexible polymer offers reduced risk to vulnerable road users in the event of a collision with the rail.

The **SMD Bracket** comes with a range of delineator colours to suit verge or median installations, all with Class 1A reflectivity.

**Meets the highest overall retro-reflectivity requirements in AS/NZS 1906.1 Class 1100.**
