

Candella, a familiar form seen in new environment...

Candlelight, and candlesticks are commonly only used in the private sphere to create intimate and welcoming environments.

We were inspired to bring this environment into the outdoors. This is how the Candella range was born. Its layered base is a distant reminder of classic cast-iron mast shapes, offset by its clean contemporary lines. The shadows created by these curves enliven the column's silhouette and give the passer-by a different interpretation of the object.
