

## The Hidden Value of Concealment Solutions

Valmont® Telecom offers creative concealment solutions designed to help your communications structures blend in with the landscape and surrounding environment, while also adding capacity to your network.

Our Larson™ line of concealment products can be custom-engineered to meet your technical specifications on the inside, while on the outside appear to be a tree, cactus, flag pole, clock tower or anything else you can imagine. And that's the point. The only thing your customers will ever notice is better wireless service.

### Natural Concealment

We offer highly realistic, aesthetically pleasing structures concealed as palm, pine, eucalyptus trees, cacti and more.

### Architectural Concealment

Structures can be blended in with the surrounding environment in the form of bell towers, clock towers, water tanks and more.
