CUSTOMISED ENGINEERING

valmont STRUCTURES

By considering the weather conditions, usage, and aesthetics related to your project, we use our expertise to recommend the longest-lasting materials based on years of research and extensive testing. We can assist at every stage of the engineering and manufacturing process, from design concepts and renderings, to sales proposals and marketing support. We ensure that our poles conform to various international industry standards and specifications.

- The structure is suitable for wind speed as per IS 875 Part III 2015 and PLG 07.
- The pole is fabricated from special steel plates, conforming to ASTM A 572/BS EN 10025.
- The welding is in accordance with the American Welding Society (AWS).
- The entire pole is single hot-dip galvanised, internally and externally as per ASTM A123 and A153.
- The top and bottom diameters and plate thickness of the poles are designed as per EN 40.
- The design life of the poles is a minimum of 25 years.
