

## SIGNAGE MASTS THAT SUPPORT YOUR SIGN AND YOUR BUSINESS

*If your business depends on people finding your location—gas station, grocery store, repair shop, etc.— then signage masts from Valmont® Structures are the best way to make sure your sign, and your business, are noticed.*

22M SIGNAGE MAST FOR SHELL AT CHENNAI

Through its decades of experience engineering and manufacturing traffic sign structures, outdoor lighting poles, high-masts and utility poles, Valmont® Structures understands the countless variables involved in creating signage masts that are installed near high-traffic roadways. Our signage masts from are the most durable on the market.

But durability is just the beginning of the value of we provide you:

- Our signage masts come with raising and lowering mechanisms, making sign repairs faster and more economical.
- We offer heights of 40 meters (sometimes higher), giving you optimal visibility while still maintaining our high standards for safety.
- Our custom design capabilities also mean they are unique to your business, offer more aesthetic value and can be coated to extend their longevity.

Meeting the needs of you, our customer, is our top priority. No matter how large or small your order, whether it's a standard product or specially designed to meet your requirement, our focus is to provide a quality product, to deliver that product on time and as per your standards, and ultimately, to be your reliable partner to help highlight your brand.

# USING THE BEST MATERIALS WISELY

With a solid foundation of in-house, engineering excellence, Valmont can design, manufacture and produce structures, which address design challenges in any environment. Valmont's tapered steel poles provide unparalleled safety from decades of technical design and manufacturing expertise.

We ensure that our high masts conform to various international industry standards and specifications.

- The structure is suitable for wind speed as per IS 875 Part III 2015 and PLG 07.
- The mast is fabricated from special steel plates, conforming to ASTM A 572/BS EN 10025.
- The welding is in accordance with the American Welding Society (AWS).
- The entire mast is single hot-dip galvanised, internally and externally as per ASTM A123 and A153.
- The top and bottom diameters and plate thickness of the mast are designed as per EN 40.
- The design life of the mast is a minimum of 25 years.

Up to 40 Metres  
in Height

Traditional  
Base Plate Design

Hot-Dip Galvanised  
for Better Protection
