STRUCTURES

UTILITY STEEL POLES
Our Power Starts With You

Valmont is recognised throughout the world as

an industry leader in power delivery structures.

Products and Services. Our global reach allows us to share best practices, materials and technologies with engineers, designers and manufacturers from other nations, ensuring that our customers get the “best of all worlds.” Multiple global manufacturing facilities allow for greater accessibility in production, coordination and ease of delivery across various locations, ultimately staying true to our commitment of providing our customers with timely delivery.

Engineering and Design. Valmont is widely recognised as a global leader in structural engineering, continually setting the standard for engineering design and installation around the world. With more than 60 years of combined experience in structural testing and design, Valmont’s engineers have the resources, the capacity and the capabilities to anticipate and meet customers’ needs, which sets us apart from the competition.

We have the right products for your power delivery applications:

- Transmission
- Distribution
- Substation

Quality Control. Valmont® takes great care at each step of the design and manufacturing process to ensure our products meet the highest quality standards and regulatory requirements while also ensuring timely delivery, adhering to specifications and being cost-effective.

From Plant to People. Today’s utility industry is seeking cost-effective ways to improve grid reliability while maximising operating efficiency. Valmont® is here to help you design and build products in the most efficient way to harness the power from power plants and channel it to homes, hospitals and businesses. Challenge us with your projects and see why we’re recognised as a worldwide leader in power delivery.

Commitment to Research. Research and Development are the hallmark of Valmont’s progress and leadership in the industry. Perfecting existing designs and developing innovative products are the major goals of the Valmont® R&D program. The developments will continue to be customer-driven to advance state-of-the-art innovations. To further advance such innovations, Valmont® participates in most major industry standards associations.

Steel Transmission

Valmont's experience and innovative ideas, combined with the unique attributes of steel, allow us to meet the challenges of today's demanding market.

- Reliable
- Versatile
- Light weight
- Easy installation
- All finishes available
- AISC Certification
- Environmentally Safe
- Aesthetically pleasing

Engineering is integrated into Valmont's CNC plasma cutting equipment creating precise steel components.

Our 2,000-Ton press brake is among the most reliable and powerful in the industry. Limitless combinations of length, diameter, thickness and taper are possible during the forming process.

Bolted and welded connections must be accomplished with the utmost accuracy to ensure proper fit-up of mating pieces.

Full penetration welds are always inspected and verified ultrasonically. The component does not progress to the next phase of fabrication until it passes completely.

Depending on your choice of finish, Valmont poles are transported to the appropriate processor to receive professional application treatments.

Substations

Valmont's tapered, tubular structures are designed for quick and easy installation and offer a higher structure weight.

- Higher deadend tension capabilities
- Less costly foundations
- Safe, comfortable maintenance access
- Lower total installation cost
- Lighter and Stiffer structures
- Space saving capabilities
- Reduce deadend structures cost
- Architecturally attractive, aesthetically pleasing

Steel Distribution

Valmont® is one of the largest suppliers of steel distribution poles in the world. Valmont® is a proven leader you can rely on for round-tapered steel distribution poles.

- | | |
|------------------------|------------------------------|
| • Consistent strength | • Light weight |
| • Lower lifetime costs | • Uniform dimensions |
| • Easy installation | • Coating and colour options |
| • Environmentally Safe | • Fire resistant |
| • Low maintenance | • Simple to order |
